Hybrid Organic-inorganic Composites

American Chemical Society James E. Mark C. Y-C Lee P. A. Biancini

Hybrid Organic-inorganic Composites - James E. Mark, C. Y-C Lee Hybrid organic–bio–inorganic materials will play a major role in the development. They can be broadly defined as molecular or nano-composites with organic. Composite materials mixtures of organic and inorganic components. They can be broadly defined as molecular or nano-composites with organic.
